Free up drive space in Windows – Microsoft Support

Windows 11 · https://cleversupport.ca/docs/windows-11/free-up-drive-space-in-windows-microsoft-support/

Windows 11

Delete files with Storage Sense

1. Select **Start** > **Settings** > **System** > **Storage** .
   Open Storage settings
2. Turn on **Storage Sense** to have Windows delete unnecessary files automatically.

Delete files manually

1. Select **Start** > **Settings** > **System** > **Storage** > **Cleanup recommendations**.
   Open Storage settings
2. Select the temporary files, unused files, files synced to the cloud, or unused apps you want to remove, then select the **Clean up** button for each section.

Move files to another drive

1. Connect your removable media to your device.
2. Open **File Explorer** from the taskbar and find the files you want to move.
3. Select the files, then select **Cut** on the ribbon.
4. Navigate to the location of the removable media, then select **Paste** .
